

## **Vehicle Safety Systems Quiz**

Please select the most appropriate response to the questions below after viewing the associated CPS video. You do not need to send this quiz to the Illinois Department of Transportation. Please save this quiz in your files. In case of an audit, this quiz will be graded. If you have any questions, please contact the Illinois Department of Transportation - Division of Traffic Safety at [buckleup@dot.il.gov](mailto:buckleup@dot.il.gov).

1. Safety belt manufacturers are required to perform “dust chamber” tests.

True False

2. Technicians should adjust the “D-ring” shoulder belt adjuster to the lowest position before properly installing a child safety seat.

True False

3. FMVSS 213 regulates safety belt systems.

True False

4. To maintain proper calibration, a vehicle seat with advanced airbag technology and an occupant classification system, should be serviced by the vehicle manufacturer if there is maintenance on the seat.

True False

5. “Smart airbags” deploy at the same rate regardless of the occupants seating position.

True False

After you have viewed the associated video and taken the quiz, please log-in to [www.safekids.org/certification](http://www.safekids.org/certification) and enter your CEUs. Each video/quiz is worth (1) Category 4 CEU for an online/web session.
